They mean Hampshire Police can apply for an order through Magistrates' courts stopping someone from contacting their partner for up to 28 days - even without the victim's consent.

Spending

HAMPSHIRE County Council is more than half way to meeting its £102million savings target, its cabinet announced on Monday.

But councillors warned there would be not let up in the drive to reduce council spending.

The council has to save £102m by Spring 2015 – totalling more than £230m savings made since

County council leader Roy Perry said: "With more people needing support in their old age and growing numbers of vulnerable children and adults needing expensive care, this is no time to be taking our foot off the pedal.

"Our toughest test is the challenge of being able to afford to provide the best quality services to those who need them most."

Councils across the UK have been set savings targets as part of central Government cuts.

Cllr Perry added: "We know from the Bank of England and the Chancellor that these cuts and economic pressures will continue to be with us for the foreseeable future."

Trust receives £5,000 county council grant

A CHARITY which cares for elderly and vulnerable people across Hampshire has been given a £5,000 grant.

The Blue Lamp Trust was given the donation by Hamp-shire County Council.

The money will support a project called the Bobby Scheme, which provides free home security and safety hardware to vulnerable residents.

Door locks, chains, spyholes, bolts, window locks or glass alarms will be given out to about 500 residents.

Council leader Roy Perry said: "Helping the elderly and vulnerable feel safe and secure in their homes is very much in line with our aim to help people retain their independence and wellbeing for as long as possible.

"This support from the county council will help many more of the most vulnerable in our communities - giving them important peace of mind."

General Manager of the Blue Lamp Trust Bobby Scheme, Mark Bradford, said: "Support from the county council not only provides us with the money to buy hardware, it also gives us additional credibility with the business community, enabling us to approach them to secure further funding through sponsorship and donations so that homeowners can benefit from a free

Dawn's first solo show

ACTRESS and comedian Dawn French discusses her life and career in her first ever solo tour coming to The Anvil on Wednesday.

Dawn is well known for her performances as one half of French and Saunders and for playing Geraldine Granger in The Vicar of Dibley, in what has been an extensive and varied career.

And she describes her tour '30 Million Minutes' as a monologue of her life rather than a stand-up show or a play.

"It's a slide show to an extent, but not just a slide show," said Dawn. "It's not like your awful, most feared auntie who's just come back from Egypt where you have to sit and watch everything.

"It's quite autobiographical, so I show you the people that have made me, so to speak. There's quite a lot about my mum and dad."

The show is called '30 Million Minutes' because that is roughly how long Dawn has lived for.

It begins with Dawn talking about life growing up in Cornwall, her father's suicide when she was 18, before start- Basingstoke next Wednesday

ing stage school and meeting doubleact partner Jennifer Saunders.

Dawn has worked with director Michael Grandage to create the show, who she has been wanting to work with for many years.

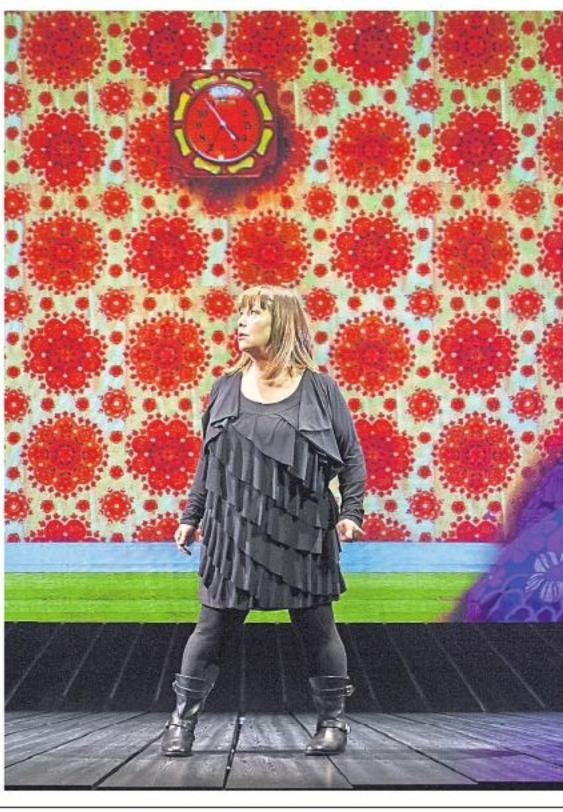

"I could have asked Fatty Saunders, but I thought, 'I'm actually going to ask a proper grown-up theatre person'," Dawn added.

"But I've always wanted to do this and I think I've dodged it a bit, because I'm aware that it's a risk.

"I keep saying to Michael, 'I need to take this out', and he says 'absolutely not, do not push it away from you. Own it and be confident about that', so that's what I've done."

Dawn's show starts at 7.30pm. Go to anvilarts.org.uk for details.

OCT will give accurate diagnosis:

- AMD
- Diabetic Maculopathy
- Macular Hole
- **Epiretinal Membrane**
- Early detection of Glaucoma

*It is estimated that approximately 2% of people over the age of 40 will have Glaucoma.

*Statistics obtained from The International Glaucoma Association.

What is an OCT scan?

This practice has invested in the very latest OCT scanning technology.

An Optical Coherence Tomography (OCT) scan is a unique test which uses near-infrared light reflected off the retina to produce a high resolution 3-Dimensional scan of the retina and associated structures.

It is particularly useful in the assessment of patients with AMD, Diabetic Maculopathy, early detection of Glaucoma and the management of these diseases. The test is non invasive, quick and entirely painless.

Am I at risk of Glaucoma?

Are you over 40? Do you have a family history of Glaucoma? Are you short sighted? Do you have diabetes? Are you of African-Caribbean origin?

If the answer is yes to any of these questions, then you are at an increased risk and should definitely have your eyes tested regularly.*

Why has this practice invested in OCT?

We believe this advanced imagery allows us to detect and monitor early stages of diseases and as this examination is not available under the NHS, we make an additional charge for this scan. Please ask for further details.

This assessment of your eyes using OCT Technology will give us the most accurate diagnosis possible and help us give you the best advice to protect your sight and the health of your eyes.

Your eyes deserve the benefits of cutting edge technology available at this practice.

Mark Thomas Activist Mark Thomas prepares for his new tour with a 'work in progress' A history of Shakespeare, told in less than two hours

ALL 37 of Shakespeare's plays will be told in just 97 minutes when the Reduced Shakespeare Company come to The Haymarket tomorrow.

Three actors perform a segment from each piece of the Bard's work, requiring quick costume changes and fast set turnarounds.

The show currently holds the record for being the longest running comedy in the West End, and has been taken on tour around the world since the 1980s.

Simon Cole is one of the actors in the show, and has been performing the complete works of Shakespeare for seven years.

"It's a great challenge, to say the very least," he said. "It's the most fun I've ever had on stage, and the audiences are fantastic because it's been going so long, so we've had many people come back to see our shows.

"There's an issue that there's a lot of female characters in the show, and we are three chaps, so it comes on me to play all the women.

"I play Juliet in Romeo and Juliet, org.uk. Gertrude in Hamlet, so it means I have to wear a lot of dresses and a lot of wigs."

It was then taken to Edinburgh, where the idea to include all 37 plays in one show was brought up.

"The show's grown from there and it's taken over the world," Simon added.

"It is a silly show, very much a family show. We get a lot of younger kids watch it, and they love all the dressing up and the props, and the great Shakespearians will get a lot of jokes the children don't get.

"We often say if you love Shakespeare, you'll love the show, and if you hate Shakespeare, you'll really love the

Exciting new estate agency comes to Chineham

centre on June 14.

Founded by Dawn Berends, who has over 20 years of experience

Brand new estate agency in the property business both as ering the highest level of service rounding villages. didn't exist - there seem to be of experience in the property lots of firms with flashy market- business. They need to be kept informed of what's happening, whether it be feedback on a viewing of their property, or simply practical advice, but most of all, buyers, sellers, landlords and tenants all want to do business with people who take care and pride in what they do and who will be honest with them."

> Loddon Properties uses the latest technology, instead of the traditional photo boards in its window, screens will show rolling slides of the properties it has available. These can be tailored to a seller's requirements, such as a room per screen or smaller images on one view.

Landlords, buyers and sellers will have access to a dedicated online zone (portal) where they can log in using their individual access code and view in depth information on what's happening with their property no matter where they are in the world. Loddon Properties staff can update the portals, remotely if necessary, so customers are not kept waiting for updates. We are ARLA acredited which means you will always receive the best level of service.

With its prime location in the heart of Chineham shopping centre, the firm is open seven days a week, and properties are prominently displayed to passers by and shoppers to ensure maximum exposure.

Soul EV joins a host of models to win top environmental certificate

New Kia impresses at awards

the Kia family has achieved a wholelife environmental certificate.

The TÜV (Technischer Überwachungs-Verein or the Technical Inspection Association) were impressed with the safety features of the car, which is to prevent humans and the environ- steps: ment from potential hazards.

The Soul EV now joins a list of Kia models to have the certificate, bringing the number of models to 11, since its first LCA award back in 2008 to the Cee'd.

The latest Kia model, achieved the award due to its environmental friendly use of materials, tailpipe emissions and recycling.

When comparing the make to it's diesel counterpart (which is currently on sale in some European countries), the all-new electric car scored impressively on its 'Global Warming Potential', emitting 39.7 per cent fewer greenhouse gases, such as carbon dioxide and methane, over the whole life of the vehicle.

The Korean manufacturers have been known to produce many cars in August.

THE all-new Kia Soul EV has proved that will benefit the environment, with to be a big hit, as the latest member of every single Kia product since 2006 being made to suit the LCA (Life Cycle Assessment) standards. Hence, why 11 of their models have won this award in the last six years.

This more environmentally friendly development process covers five major

- Detailed physical analysis of the product during the development process to verify recyclability
- · Streamlining of the manufacturing process through improvements in use of materials and simplification of parts
- Use of eco-friendly materials
- Utilisation of 3D drawings at the design stage to verify recyclability
- · Application of a check-sheet to evaluate the vehicle's environmental credentials throughout its lifecycle

The Soul EV, which has already been released in its native Korea, will be released in the UK later on this year. This car will also make American history, as it will be the first ever car allelectric vehicle by Kia to be used in the United States when it is released

The new Kia Soul EV has been awarded a whole-life environmental certificate

End of the road

Responsible drivers scrap their vehicles at an Authorised Treatment Facility (ATF).

ALSO BREAKING 500 CARS ALL PARTS AVAILABLE

Because only an ATF can legally scrap a vehicle.

That means any pollutants will be made safe before it's recycled in an environmentally friendly way.

What's more, for certain types of vehicle you'll get a DVLA approved Certificate of Destruction (CoD). A CoD proves the ATF has told DVLA your vehicle has been scrapped and is no longer your responsibility. www.direct.gov.uk.motoring
